EXPERIENCE

02/2020 - Present

Rostov on Don

Freelancer
Self Employed

· Developed responsive, mobile-first websites using HTML5, Tailwind CSS, and Bootstrap.
· Designed and developed RESTful APIs and backend solutions with Node.js, Express, Ruby on Rails, and databases such as PostgreSQL, MySQL, MongoDB, and Redis, utilizing ORMs like Mongoose and Prisma.
· Built full-stack applications using React, Angular, and Next.js.
· Conducted data analysis with NumPy and Pandas; visualized data using Matplotlib and Plotly.
· Performed web scraping with Node.js, Puppeteer, and Playwright.

05/2017 - 01/2020

Rostov on Don

Front End Developer
TradingView

· Developed a rich interface for placing trading orders.
· Integrated brokers into the platform.
· Improved chart functionality, fixed bugs, and performed refactoring.
· Created, maintained, and utilized the company's UI kit of components.
· Developed new indicators for the Charting Library.
· Created guides and examples for integrating the Charting Library with modern web frameworks such as React, Angular, and Ruby on Rails.
· Developed indicators in Pine Script for the entire TradingView platform.
· Increased code coverage with unit, functional, and integration tests.

06/2016 - 04/2017

Rostov on Don

Front End Developer
DealerPoint

· Developed new modules for the CRM using AngularJS and Ruby on Rails.
· Refactored and translated the old codebase from Spine.js to AngularJS.
· Created a Trade-in module for the CRM using Angular and Ruby on Rails.
· Optimized the rendering of reports on completed car purchase/sale transactions.

COURSES

09/2009 - 07/2013

Rostov on Don

Bachelor in Mathematics and CS
Southern Federal University (former Rostov State University)

12/2021 - 02/2022

Coursera

Machine Learning
Stanford University

12/2022 - 12/2022

Coursera

Introduction to Statistics
Stanford University

SUMMARY

With 8+ years of full-stack development experience, I specialize in delivering high-performance, scalable web applications using the MERN/PERN stack (MongoDB/PostgreSQL, Express, React, Node.js), TypeScript, and Next.js. My expertise spans both frontend and backend, including responsive websites, RESTful APIs, and data-driven apps, along with backend experience in Node.js and Ruby on Rails.

Guided by SOLID principles and Agile methodologies, I build maintainable, efficient solutions, ensuring quality through TDD/BDD. Proficient in managing CI/CD pipelines with tools like GitHub Actions, Docker, Jenkins, and Vercel, I'm dedicated to optimizing workflows and delivering impactful results.
